Disclaimers: Colors in the table above are mentioned with their generic names, without any commitment from manufacturer side to a specific color variation, shade or intensity or any other possible generic or specific definition of color. Manufacturer reserves the right to change colors at any time inside the generic ranges defined by the above names. Dual color anodizing is an handmade process that cannot give by itself consistent results in junctions between colors, and may also result in shades and color smudges. These are not considered anodizing defects.
